SUMMARY

Frontend Developer with a strong foundation in **HTML, CSS, and JavaScript**, currently expanding my skills in modern web development. I have hands-on experience building responsive and user-friendly web interfaces and am passionate about creating clean, efficient, and visually appealing designs.

I am currently pursuing a Bachelor's degree and continuously improving my development skills through self-learning and practical projects. I am interested to gain real-world experience through an internship where I can contribute to team projects, learn industry best practices, and grow as a developer.

SKILLS:

Technical Skills:

- HTML5 (Forms, Semantic Tags).
- CSS3 (Flexbox, Good Responsive Design).
- JavaScript (ES6, DOM Manipulation, Event Handler, API Fetch).
- Basic Git & GitHub and Figma Application for Design.
- Debugging & Problem Solving.

Soft Skills:

- Communication in Basic English and Hindi languages, Analytical thinking, Decision making.

PROJECTS:

To-Do Application [\[Link\]](#)

- Built an interactive task manager using JavaScript.
- Implemented add, delete, and task status features.
